

### **SUSTAINABLE** DISPLAY FORMS

We produce POP material for mannequins manufacturers and commercial decoration companies, interacting with their production departments.

#### THE MATERIAL

The paper paste has excellent environmental qualities; it is made of recycled newspaper and cardboard, this way the resulting products are both recyclable and biodegradable.

#### 100% CUSTOMIZED SERVICE

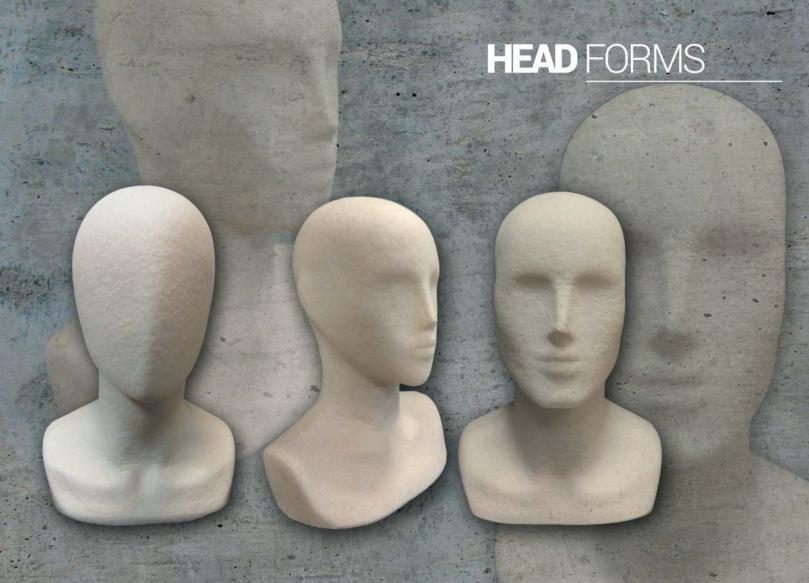

Our patented manufacturing system allows us to be very flexible from the first drafts to the delivery. We can produce both medium and large serials easily, delivering in a short period of time.

#### IN HOUSE PRODUCTION

We produce everything in our facilities in Barcelona, reducing the carbon footprint and offering a quick and effective service.
